PROFESSIONAL SUMMARY

Solo founder building **Finwiser**, a **SEBI-registered, fee-only AI fintech** that converts consented Account Aggregator data into regulated, explainable financial decisions for India's salaried middle class. Previously a Director-level operator with **10+ years** across consumer, edtech, and technology businesses, owning P&Ls up to **₹150 Cr** and leading **400+ member teams**. After teaching applied AI to thousands of professionals, I taught myself financial regulation and AI-assisted software engineering, earned **SEBI Investment Adviser registration**, received **FIU 2.0 certification**, and built Finwiser's full-stack MVP end-to-end. My career pattern: enter unfamiliar domains — an exam, an industry, a regulator, a codebase — and reach an elite execution level fast.

PROFESSIONAL EXPERIENCE

FINWISER

Founder

Jul 2025 – Present

- Achieved **FIU 2.0 certification** to operate within India's **RBI-regulated Account Aggregator (open-banking) network** — implementing the central bank's full technical specification (ReBIT NBFC-AA) and passing independent conformance and security testing required to go live in the regulated ecosystem
- Single-handedly built and shipped Finwiser's **full-stack regulated fintech MVP** — mobile app, backend, data pipelines, household ledger, dashboards, and decisioning engine — using **AI coding agents such as Claude Code** as leverage, while remaining solo, bootstrapped, and unpaid
- Earned **SEBI Investment Adviser registration** and cleared NISM Series X-A & X-B — building deep regulatory fluency with **no prior finance or software career**
- Designed the core decisioning engine: **unified household ledger**, surplus allocation, goal feasibility, emergency-fund adequacy, risk profiling, debt analysis, and explainable recommendations
- Now in **closed beta testing** with real Account Aggregator-linked financial data, ahead of a controlled public launch
- Lead **product, engineering, compliance, regulation, fundraising, GTM, and customer support** end-to-end as a solo founder

GROWTH SCHOOL

Business Sales Leader

Jul 2023 – Jul 2025

- Built and led **applied-AI and automation training programs**, reaching thousands of professionals on AI use cases across sales, business, and productivity workflows
 - Led sales and GTM execution for a high-growth platform, managing a **team of 60+** and driving revenue outcomes through consultative selling and pipeline discipline
 - Deployed AI-powered tools — WhatsApp automation and AI call systems — resulting in **20% increase in qualified lead conversion** and **5X ROI** from legacy pipelines
 - Integrated CRM systems enabling real-time pipeline visibility, reducing lead response time to **under 10 minutes** and improving sales team accountability
 - Standardized external-facing communication frameworks, reducing sales dependency and sharpening product value propositions
 - Executed cost optimization strategies reducing **marketing spend by 33%** while maintaining revenue stability — demonstrating disciplined P&L management
-
